HSSE AND QUALITY SPECIALIST (M/F/D)

Description

Ensure the implementation, maintenance, and continuous improvement of the company's integrated management system, covering Quality (ISO 9001), Health and Safety, Environmental compliance, and Occupational Health. Promote a strong culture of prevention, legal compliance, and operational excellence across all levels of the organization.

Responsibilities

- Maintain and improve the ISO 9001 Quality Management System;
- Ensure legal compliance in health, safety, and environmental areas;
- Coordinate audits, internal training, and continuous improvement initiatives;
- Liaise with external entities (auditors, occupational health services, environmental authorities).

Qualifications

- Degree in **Engineering, Quality, Safety, Environmental Management, Industrial Management, or related fields**;
- **Certified Occupational Safety Technician (Nível VI)**;
- **Training in ISO standards auditing** (preferably ISO 9001; ISO 14001);
- Knowledge of applicable legal requirements in quality, health & safety, and environmental areas;
- Strong organizational, communication, and problem-solving skills;
- Proactive, autonomous, and committed to continuous improvement.

Job Benefits

- Collaborative and supportive work environment;
- Ongoing training and professional development;
- Active involvement in impactful projects;
- A culture of respect, responsibility and continuous improvement.
